# Safe Transfer of Care MNC Project
What Is Our Story?

1 GPs & Hospital Clinicians saw the need to work together to improve their patients' discharge journey

DISCHARGE

2 A project was set up to help improve the future of how patients are discharged from hospital

3 We found that we need to improve the discharge journey by:

A Improving the quality and content of the discharge document

We surveyed GPs, set-up a steering group, engaged with NSW Health and the Australian Digital Health Agency
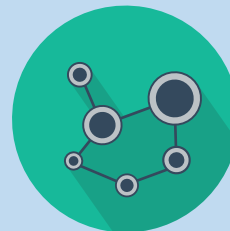

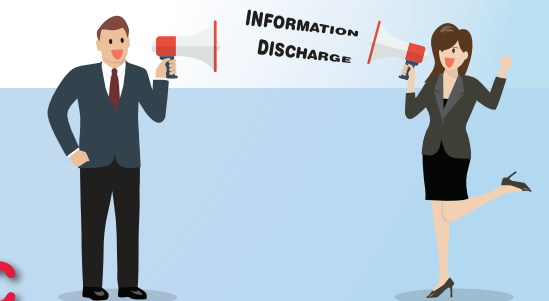

B Fixing GP information in the hospital systems

We are working with other hospitals and technicians across the region to do this!

INFORMATION DISCHARGE

C Improving the process to inform hospitals of GP information updates

The Primary Health Network and the Local health District will work together to do this!
