

# Setting up a Private Practice

THE PRACTICAL SIDE

FREE SEMINARS

We invite you to our seminar where you will learn about the practical steps of setting up your own practice from health industry experts - everything from securing premises, legal requirements, council approval, design and fitout, finance options, IT and phone solutions, MBS/ PBS/ DVA registrations, recruitment and so much more.

You will be provided with a **business plan template** to complete throughout the course of the day.

By end of day you should have an outline of the steps involved in setting up a practice and a rough cost to your practice go live date.

Medical practitioners shall present their personal experience, hurdles and quick wins that they experienced when setting up and operating their medical practice.

Hear also about the invaluable insights from the owner of a failed practice!

## Need more information?
