Mastering Migraine Management

Migraines are a leading cause of adult disability with an estimated five million headache sufferers in Australia. Primary healthcare physicians need to understand the latest advances in the diagnosis and treatment of migraines to manage patients who suffer from this debilitating condition.

Education focused on the essentials of migraine management, which transfers specialist knowledge from neurologists to general practitioners, will improve the lives of these patients.

Course Director Tissa Wijeratne, Chair of Academic Medicine and Director of Neurology at Western Health, and his team of neurologists have developed this dynamic course to capture the most recent clinical research and developments in migraine management.

The course includes a comprehensive and practical diagnosis approach, management plans for acute headache attacks and preventative strategies to manage migraines.

Tissa believes by transferring knowledge to primary healthcare professionals headache sufferers will be diagnosed and treated more timely manner, rather than waiting for a specialist care.

Convenience

Fully online. Study on iOS, Android and Windows devices or on web

Reinforcement

6 interactive tutorials and 20 online case studies to practise interpretation.

Recognition

Certificate of Completion issued upon course completion.

For more information, visit medicine.unimelb.edu.au/mlu

Course Outline

This course is comprised of 6 interactive tutorials (including post tutorial self-assessments) and 20 case studies.

Course units

- Tutorial 1: Acute Migraine
- Tutorial 2: Chronic Migraine
- Tutorial 3: Medication Overuse Headache
- Tutorial 4: Other Primary Headaches
- Tutorial 5: Secondary Headaches
- Tutorial 6: Doctor Patient Communication

Delivery mode

Fully Online (approximately 8 hours of learning)

Course Director

Tissa Wijeratne

Course fees

AUD \$550 (Including GST)

AUD \$330 For Nurses, medical students and doctors in training
