This course is designed to help practices with:

COMPLIANCE

WELLBEING

CLINICAL

MANAGEMENT

This course is eligible for self reported professional development activity points.

ONE HOUR ZOOM WEBINAR

**Wednesday 16 September 2020
6:30pm - 7:30pm**

Live and interactive

Completion certificate

Downloadable resources

2 weeks on demand access

Live Q&A with presenter

Course presented by:

Becky Ingham-Broomfield
Cardio-Thoracic Nurse

Course Overview:

The ECG is a common diagnostic tool used in General Practice to record the electrical activity of the heart from different angles to identify and locate pathology.

When nurses are asked to perform a 12 lead ECG, there is an expectation that they know how to use the equipment and are able to recognise a normal or abnormal result. This webinar will support clinicians conducting ECGs in general practice to build confidence in this task.

Completion of this webinar will support practices to address the RACGP accreditation standard: GP3.1 C Our clinical team is trained to use the practice's equipment that they need to properly perform their role.

Learning Outcomes:

- ☑ Identify normal anatomy & physiology of the heart including the electrical system and the laws of electricity.
- ☑ Determine correct lead placement to record 3 & 5 lead monitoring and their relationship to parts of a 12 lead ECG.
- ☑ Recognise the timing and components of a 12 lead ECG, common cardiac rhythms and affected heart anatomy.
