## ONE HOUR ZOOM WEBINAR

**Wednesday 30 September 2020  
6:30pm - 7:30pm**

Live and interactive

Completion certificate

Downloadable resources

On demand access

Live Q&A with presenter

### Course presented by:

Ann Fowler  
Registered Nurse and Clinical Nurse  
Consultant Chronic and Complex  
Wounds

### Course Overview:

Wound management is an evolving area of health science. Until relatively recently, wound management was generally considered a nursing modality rather than a condition requiring an integrated team approach. Contemporary wound management includes holistic assessment with a focus on the aetiology of the wound and managing co-morbidities and contributing factors.

This one hour webinar will provide an unbiased update on wound management approaches, including strategies that can be implemented in general practice and aged care settings. The principles of wound management and the healing process will be reviewed along with a refresher provided on wound assessment. Ann will then explore the revolving door of difficult wounds and provide some potential practical solutions that can be applied.

This event will assist organisations to provide the education to clinical staff to meet RACGP Standard 2 Comprehensive Care and the Aged Care Quality and Safety Commission Standard 3 Clinical Care.

### Learning Outcomes:

- Apply a person centered approach to wound management.
- Describe the principles of the wound healing process.
- Adopt best practice strategies to problem solve difficult wounds.
