Mid North Coast Local Health District (MNCLHD) Admission and Discharge Notifications (ADN) Pilot

SEPTEMBER 2020

MNCLHD's ADN pilot starts Tuesday 29 September 2020 and will be trialled for six months. The pilot has been designed by eHealth NSW's Integrated Care Program in partnership with MNCLHD and is designed to help shape a future statewide solution.

Notifications, sent as an event summary, will be delivered from MNCLHD hospitals to the patient-nominated GP via secure messaging.

"Awareness of admission (means I) can talk with clinical staff if we have important information that they need for care of the patient. Can also contact family and arrange supports etc and be aware that patient may need to (see) us after discharge and arrange early DC review especially if DC summary is not timely e.g. orthopaedic admissions."

Mid North Coast GP, 2019 MNCLHD GP Survey

The MNCLHD ADN pilot seeks to improve the flow of information to the GP about a patient's health journey beyond primary care. Make sure you have updated your GP contact details to help ADNs and discharge summaries reach the right clinician. Visit the webpage below and click on the MNCLHD link to update your contact information.

Event summaries include:

- ED discharge notification
- COVID-19 Clinics notifications
- Admission notifications – inpatient, including when a patient is transferred from ED to an inpatient ward
- Discharge notification – inpatient

SEE EXAMPLE NOTIFICATION ON PAGE TWO.

Healthy North Coast, the organisation behind the North Coast PHN program, is supporting the pilot by helping to share information with general practices and Aboriginal Medical Services. Details about the pilot can be found on Healthy North Coast's Primary Care Impact webpage.
