

STAY HOME, STAY SAFE

New Telehealth Service

Supporting Communities and Health Care Services Affected by Floods

To support our local health care providers and communities, the Healthy North Coast GP Telehealth service has been launched as part of the Commonwealth's flood-relief support program.

Residents in flood-affected areas who are not able to get an appointment with their regular GP can now book a telehealth appointment any time of the day, seven days a week.

Healthy North Coast GP Telehealth can provide:

- Information, advice, diagnosis and treatment
- Prescriptions sent to your local pharmacy
- Medical certificates
- Specialist referrals
- Care summaries provided to patients, regular GP and My Health Record

Our postcode checker will tell you if you can use this service. Use this QR code or visit:
