EPIK Research Project: Evaluating a training program for Practice Nurses in early identification and management of Chronic Kidney Disease

The Northern NSW Local Health District in partnership with Healthy North Coast, Southern Cross University and the NSW Agency for Clinical Innovation invites you to be part of phase 2 of local research. The research project aims to increase identification and improve management of Chronic Kidney Disease (CKD) in general practice. We will test the applicability of a webinar series developed during a pilot with 6 local general practices in 2017-19.

A maximum of 15 practice nurses will participate in each webinar series and a total of 100 will participate in the project. Each webinar series is hosted by a local advanced practice kidney nurse facilitator. Research data collection will be finished by September 2022 and results published in December 2022.

Join us for a live, 6-part group webinar series completed monthly in your home or workplace for 6 hours of CPD.
