

**Chronic Kidney Disease Webinar Series**

Understanding Chronic Kidney Disease: for Aboriginal health workers and GPs

Chronic kidney disease (CKD) represents a major challenge for patients and the healthcare system. Approximately 1.7 million Australians aged 18 years and over have indicators of CKD, and due to the high costs associated with dialysis and transplantation, kidney disease costs the Australian health system an estimated \$5.1 billion each year. Indigenous Australians are at increased risk of CKD.*

We've partnered with Kylie Wyndham, CKD Nurse Consultant at Northern NSW LHD to deliver three webinars to help your understanding of CKD*.

For Aboriginal health workers

PART ONE

Wednesday 20 October 2021

12.30–1.30pm

PART TWO

Wednesday 27 October 2021

12.30–1.30pm

Turn to page 2 for more details.

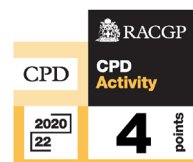

For GPs and GP registrars

Early detection and management

Wednesday 27 October 2021

6.30–8.30pm

Chronic Kidney Disease Webinar Series

Understanding Chronic Kidney Disease: for Aboriginal health workers and GPs

FOR ABORIGINAL HEALTH WORKERS (LUNCHTIME)

Wed 20 & 27 Oct 2021

12.30–1.30pm

Learning outcomes

In this two-part lunchtime webinar series, we will use an Indigenous case study to:

- Assert the high prevalence and poor outcomes of CKD in Australian Indigenous peoples and state the major risk factors for developing CKD
- Identify the role of the Aboriginal health worker in the detection and management of CKD and explain the decisions required to help CKD
- Learn some language (jargon) of CKD and develop confidence to discuss CKD testing and management as part of chronic disease management
- Discuss local HealthPathways and referral options

FACILITATED BY

Noell Burgess, Aboriginal Health Coordinator,
Healthy North Coast

Kylie Wyndham, CKD Nurse Consultant,
Northern NSW Local Health District

FOR GPs AND GP REGISTRARS (EVENING)

Wed 27 Oct 2021

6.30–8.30pm

Learning outcomes

In this evening webinar, we will present an interactive case study to:

- Outline the importance of early detection for those at risk of CKD (including the high prevalence and poor outcomes of CKD in Australian Indigenous peoples)
- Describe the elements of the assessment for CKD (kidney health check)
- Define the treatment options to delay progression of kidney disease
- Discuss local HealthPathways and referral options

GP SESSION SPEAKERS

Dr Belinda Stallard, Nephrologist, John Flynn Hospital

Dr Aye San, Nephrologist, Flow Health and Cardiac
Diagnostics & John Flynn Hospital
