

Monkeypox

Monkeypox is a viral infection usually spread by skin-to-skin contact with someone who has symptoms or by direct contact with contaminated objects.

Symptoms:

- Rashes, lesions or sores, particularly in areas that are hard to see such as the genitals, anus or on the face, arms and legs.
- Ulcers, lesions or sores in the mouth.
- Fever, headache, muscle aches, backache, swollen lymph nodes, chills/exhaustion.

Speak to staff and seek medical help **immediately** if you have symptoms. You may need to self-isolate straight away.
