

FREE ONLINE TRAINING MODULES

To help improve eye health care, Vision 2020 Australia has developed a range of free online training modules for healthcare professionals working across the primary care sector. An excellent opportunity for GPs to earn CDP Points from RACGP and keep up to date with the latest in eye health care.

CHILDREN'S VISION

A one – hour course for GPs that will cover management of paediatric ocular concerns. This module includes a refresher on eye anatomy, information on visual development milestones, information and tips how to conduct pupil and motility tests; how to check visual acuity for children of different ages and how to identify common refractive conditions; and how to examine, identify, manage and refer acute paediatric ocular presentations.

DIABETES AND EYE HEALTH

This one – hour course is for diabetes educators and others working with people living with diabetes, including Aboriginal health workers and practitioners. The course examines how diabetes can affect eye health and vision, and your role in vision loss prevention through education and support you can provide to people living with diabetes.

Please Note: Learners need to first complete An Introduction to Eye Health and Vision Care. The combination courses 'Introduction to eye health and vision care & Diabetes and eye health' have been attributed 3 CPD point under the ADEA Endorsed Educational Program (End of certification July 2025).

OCULAR EMERGENCIES

This one-and-a-half-hour Ocular Emergencies course is aimed at general practitioners (GPs). This course aims to help GPs build knowledge and confidence in early assessment and prompt intervention of ocular emergency presentations. This module includes background information on eye anatomy, eye care services and referral pathways; information and case studies on how to identify, manage and refer ocular emergencies, including presentations of acute vision loss, ocular trauma, acute red eyes and particular cases of paediatric emergencies.
