

Don't let the flu STOP YOU

Protecting little ones from the flu just got easier with a free nasal spray flu vaccine.

This year, the NSW Government is funding a free nasal spray flu vaccine for children aged 2, 3 and 4 years.

It's available through GP clinics, community pharmacies and Aboriginal Medical Services from April to June 2026, while stock is available.

Talk to your GP, pharmacist or local Aboriginal Medical Service about the best flu vaccine option for your child.

Visit hnc.org.au/flu for more information about preventing the flu.
