

DIABETIC FOOT MANAGEMENT

Think Beyond the Wound

W H E N

30 OCT
2026

Time: 0800–1800

W H E R E

**Venue: East Maitland
Bowls Club, 23 Banks Street
East Maitland NSW**

C O S T

\$285
per participant

This one-day event **explores the multifaceted challenges of diabetic foot management**, recognising that wound healing is influenced by much more than the choice of dressing. Participants will explore neuropathy, vascular disease, infection, pressure and biomechanics, comorbidities, patient behaviours and the wider social and clinical environment, focusing on practical assessment, clinical decision making and translating evidence-based principles into everyday practice.

TWO WORKSHOPS, ONE BIG PICTURE

01

Workshop 1 · Dressing Selection for Diabetic Foot Ulcers

Morning session · Practical wound bed preparation and evidence-based dressing selection

- + Wound bed preparation & assessment
- + Management of bioburden, slough & exudate
- + Wound hygiene & wound environment
- + Evidence-based dressing selection
- + Matching dressings to clinical need
- + Tissue & wound environment assessment
- + Assessment & management of the wound
- + Select dressings with best evidence
- + Optimising the wound environment
- + Practical application & case discussion

Workshop 2 · Diabetic Foot Offloading

Afternoon session · Pressure, mechanical load and patient-centred offloading strategies

- + Practical offloading strategies & devices
- + Footwear selection & fitting
- + Pressure redistribution principles
- + Adherence & patient-centred planning
- + Footwear & devices for diabetic foot
- + Incorporating offloading into daily practice
- + Realistic patient-centred care
- + Interactive case studies & activities

Important — completion does not authorise participants to independently perform clinical procedures. Endorsement remains subject to your organisation's policies.
